Art Unit: 1761

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, 19, and 20, drawn to a pectin product, classified in class 426, subclass 615.
  - II. Claims 11-18, drawn to a method of making pectin, classified in class 435, subclass 275.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following **can** be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, pectin can be made by a different process than cited in the specification.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Examiner Roy Teller and Robert Strozeir on 8/27/02, a provisional election was made without traverse to prosecute the invention of Group I, claims 1-10, 19, and 20. Affirmation of this election must be made by applicant in replying to this Office action. Claims 11-18 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 4, it appears that "about" is misspelled in line 3.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

8. Claims 1-10, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamaguchi et al and under 35 U.S.C. 102(a) as being anticipated by Gnanasambandam et al.

Either one of Yamaguchi et al or Gnanasambandam et al disclose a pectinaceous material prepared from soybean hulls, and absent a showing otherwise, it is considered inherent that same would exhibit the characteristics called for in the instant claims. It should be further noted that Gnanasambandam et al further discloses

food products employing said pectin. As for Yamaguchi et al, it is considered inherent that same would be employed in food products.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Weier whose telephone number is 703-308-3846. The examiner can normally be reached on Monday-Friday.
